

Actions ahead for the green and digital transition of the construction ecosystem

Agenda for webinar on Wednesday 7 December 2022, 14:00 – 15:30 CET

This webinar will explore challenges and opportunities of the twin transition for the European construction ecosystem, looking at existing and future plans by the European institutions as well as projects that Ecorys has been implementing to support this industry. It will also be an occasion to take stock of lessons learnt in 2022, discuss relevant policy developments and draw steps for 2023.

All stakeholders from and interested in the construction ecosystem are welcome to participate in this session, from SMEs to large companies, experts, business associations and public authorities.
