

Ecorys in India

Ecorys

Ecorys is a leading **international** research-based consultancy offering sound analyses and independent advice on economic, social and spatial issues to public and private clients.

With over 500 professionals and a global spread of 25 permanent and representative offices, we deliver real benefits to society through delivered **research, consultancy and project management** in more than 100 countries annually. Our clients benefit from the wide range of expertise and multidisciplinary knowledge that challenge complex issues across borders.

Our history spans more than **90 years**, with Nobel Laureate Professor Jan Tinbergen having been a director for many years. Following our legacy, we share best practices within our company and with our clients and value our independence, integrity and partnerships.

Our extensive network of offices spans 110 Countries

1929

A group of businessmen in Rotterdam form the Netherlands Economic Institute (NEI).

1935

Prof. Jan Tinbergen becomes NEI director. NEI is closely linked to the Erasmus University Rotterdam.

1949

NEI focuses on contract work, and its ties with the university are loosened.

1969

Professor Tinbergen is awarded the first Nobel Prize for Economics

1990

NEI BV formed

1999

NEI BV merges with Kolpron Consultants BV

2000

ECORYS is formed ECOTEC Research & Consulting (UK) joins the group.

2011

Ecorys India established

Mission & Vision

Our Vision

We focus our talents on helping our public and private clients to improve policy and programme outcomes across the globe.

Our Mission

To be one of the world's leading research and consultancy firms, well respected for our sound analysis and inspiring ideas, our expert staff and the quality of their work, our inherent drive for improvement and the care we show for our staff, our clients and our global environment.

Ecorys takes its responsibility as a global citizen seriously. There is a worldwide emphasis on our core values.

We reinforce these values through programs at both the corporate and business unit levels.

We are dedicated to client satisfaction and to continuously improving our operations.

Our Core Values

Independence

Ecorys is for the greater part owned by its employees. The only 'external' stakeholder is the Foundation NEI which invests its revenues in promoting applied economic science, with the Ecorys Research Programme being one of the main beneficiaries.

Integrity

Ecorys enjoys a reputation for conducting its business with integrity and with respect for the interests of those our activities can affect. This reputation is an asset, just as real as our people and brands.

Corporate Social Responsibility

We organise our operations in a sustainable manner and aim to offset our impact on the environment. Our CSR efforts are about creating 'shared value' that benefits society and business and are a joint effort by company and staff, with awareness and caring as keywords.

Ecorys INDIA

India's growth story is envied but for it to be **sustained** India requires able, competent and independent support.

Ecorys offers more than 90 years of experience in assisting countries with policy advice and programme management.

We bring **international best practices** and know-how. We understand the importance of social and political factors shaping the economy of a country. However international expertise alone cannot serve the Indian needs.

This is where Ecorys India brings in its **in-house** expertise backed by our wide breadth of knowledge & international network in providing sound analysis and inspiring ideas.

Health and Education

HEALTH care

Health is important to many aspects of society and a cornerstone in socio-economic progress. Being in good health is appreciated world-wide. However, health care is developed under diverse national or local circumstances, influenced by historical, political and cultural factors. A diversity of health systems, services and markets have evolved around the world characterized by different patterns of health care demand, wealth and economic opportunities.

Ecorys has rich expertise in the area of health, taking an integrated and active approach to the various areas of health care including health care **financing**, health care market, health **policy** analysis, health care **strategies**, and investing in health.

Our services in this field include:

Regulatory impact assessment, Evaluation and monitoring, Institutional strengthening, Investment appraisals, Cost benefit analysis, Expenditure reviews, Feasibility studies and Sector analysis.

Selected PROJECTS

- India: Technical Assistance Provider to the Uttar Pradesh Health Systems Strengthening Project (UPHSSP)
- Afghanistan: Support for the Ministry of Labour Social Affairs Martyrs and Disabled.
- The Philippines: Technical Assistant to the Department of Health for the Management of the EC Health Sector Support
- Ukraine: Support to Secondary Health Sector Reform.
- Namibia: Final Evaluation of HIV/AIDS Response Capacity Development

- The Netherlands: Programme Evaluation of Education & Health
- Poland: Modernisation of the educational offer in Poland
- Turkey: Technical Assistance for Active employment measures at local level.
- Development of Rural District & Local Municipalities under Municipal Growth Initiative Project in South Africa.

Education & SKILLS

Education is the key to participation of individuals in society. **Good education** and **policy** are major contributing factors to any well-functioning society and strong economy. A good **functioning** national education system has to do with quality, accessibility and cost of education, organisation and policy and the correlation with the labour market.

This is of course obvious for children and youths, who will soon become productive members of our society. But it also goes for adults: lifelong learning is a very important theme in national and European policies.

Dedicated education experts of Ecorys work closely with education institutions, interest groups and policy makers. We work at regional, national and international levels in order to **optimise education systems** and promote **skills development**.

Public Finance and Governance

Citizens around the world have become more critical concerning their government's expenditure, taxation and deficit policies, and results of policies in terms of sustainable economic growth and reducing poverty. Governments are expected to be accountable and to deliver high-quality public services. There is an increasing awareness of the need to set up efficient and workable macro-fiscal management arrangements and Public Finance Management (PFM) systems in order to cope with increasing expectations.

Ecorys has a wealth of Public Finance & Governance expertise in countries across the world. We have in-depth understanding of the strengths and weaknesses of macro-fiscal and Public Finance systems and can offer solutions to specific problems.

Ecorys has a strong track record in fields such as Budget cycle formulation and MTEFs, budget execution performance budgeting, strengthening municipal financial management and macroeconomic studies and evaluations.

MACROECONOMIC Analysis

Our macroeconomic analysis and advice to our clients include **developing and implementing** national and sector strategies and policies that contribute to sustainable economic growth and poverty reduction.

Some of our macroeconomic work has been used in our PFM reform activities.

We have created **economic and fiscal strategies** that have been the basis for developing the medium term economic and fiscal framework.

We help governments in doing realistic estimates of the costs of the various programmes of **Poverty Reduction Strategies (PRS)** which are the basis for national growth and poverty reduction and clear the way for IMF and World Bank assistance.

Public FINANCE Management

Through public expenditure reviews Ecorys **assesses** the efficiency and equitable distribution of existing spending and other support programmes and provides **recommendations** to improve them.

Ecorys experts have participated in Country Financial Accountability Assessments .Public Expenditure Reviews (PERs) and other budgetary and fiduciary assessments in many developing and transition countries.

Selected PROJECTS

- Worldwide: Public Finance Management training programme
- Slovakia: Public Finance Management Reform
- Bulgaria: Support for Implementation of Medium Term Strategy and Restructuring of the Ministry of Finance
- Worldwide: Public Expenditure and Financial Accountability assessment
- Guatemala: Public Financial Management Budget Support
- Tajikistan: TA for development of Medium Term Expenditure Framework – Social Sectors
- Moldova: Public Financial Management Project : Budget Formulation and Execution Methodology
- Kuwait: Fiscal Restructuring
- Russia: Administrative Reform to improve Public Expenditure Management

Competitiveness and Trade Policy

Successful **trade and industrial policy** is most commonly associated with economic growth and increased prosperity.

Foreign direct investment can bring with it resources and expertise that spread throughout the local economy. Increased access to markets may in turn provide increasing opportunities to local businesses.

Trade policies need to embrace more than just the opening of markets. Trade and FDI should be harnessed, as business cannot be separated from the natural environment or the society in which it operates. Increasing **competitiveness** will help overall, but can also cause short-term pain for some industries and social groups.

To turn static comparative advantage into **dynamic** competitive advantage in the market place, Ecorys assists first in identifying sectors that hold comparative advantage. Next, we provide trade, industrial, enterprise **policy advice**, support with capacity building in the related fields, including in export and investment promotion, market surveys, sectoral competitiveness guides and advice on FDI

Selected PROJECTS

- India: Supporting Rajasthan's Productive Clusters in the Delhi-Mumbai Industrial Corridor (DMIC)

Energy, Environment and Water

ENVIRONMENT

A healthy, clean and thriving natural environment enables the supply of sufficient food, protection from natural disasters and provides the derived goods and services that fuel our economy to maintain the social cohesion of our communities. Environmental consultancy work at Ecorys reflects these challenges:

- Developing strategies for **biodiversity** protection,
- Understanding **forest degradation** and fragmentation,
- Analysing **disaster** scenarios and risk management.
- Integrating **green** measures and instruments
- Overcoming market failures that result in externalities,
- Addressing **environmental governance** weaknesses, and
- **Environmental impact** of national policies on the environment .
- **Climate** change issues

Water Resource MANAGEMENT

Ecorys offers expertise in areas such as economic and social cost-benefit analyses and socio economic instruments for sustainable water management. Our experts are involved in establishing and advising institutions on integrated water policy and management and solving spatial distribution problems. Our assignments include providing advice on the determination of the price of water, to financial and economic assessments of infrastructure and water related spatial planning and transport projects.

ENERGY

Ecorys Energy is one of the fastest growing businesses of Ecorys. We deliver strategic advice to policy-makers by combining in-depth energy and environmental expertise with a clear understanding of the societal and economic context in which new policies have to be implemented. In this field, Ecorys offers consulting services such as:

- Policy advice,
- Evaluation and monitoring of programmes and policies
- Cost-benefit analysis
- Modelling and scenario-building

Our services related to **renewable energy** span a wide spectrum of technologies including solar power, on- and off-shore wind energy, and energy from biomass. Furthermore, our expertise covers analysis of the impact of renewables on energy infrastructure such as district heating networks, 'smart' grids and biogas hubs.

Our **energy efficiency** consulting services focus on the building sector which is of particular importance for energy efficiency measures. Besides the building sector, we also focus on services related to energy-efficient consumer goods and services.

Selected PROJECTS

- India: Implementation of Gender Action Plan and Community Awareness Program under Jammu & Kashmir Urban Sector Development Investment Program - Project 3
- India: Support Agency for Multi Village Scheme for Karnataka Rural Water Supply and Sanitation Agency.

- Netherlands: Review of funding mechanisms and policy advice on aspects regarding an assessment of the Dutch contribution to Millennium Targets for Water, Sanitation and Energy.
- Europe: EU nuclear power plants and other generation technologies due to the effect of climate change

Transport Mobility and Infrastructure

Roads & HIGHWAYS

Good roads are essential to gain access to the remotest regions of countries and in turn for its development. their countries.:

At Ecorys we provide insight into the **social and economic** effects of the goods transport sector. We measure the impact of policy instruments on the sector itself. Our expertise, creativity and scientific approach are translated into concrete **practical advice**.

RAIL & Urban Public Transport

More than any other technical design or social institution, the railway stands for modernity. No competing form of transport has facilitated change on the scale that has been brought about by the invention of the railway. Ecorys has an excellent track record of **advising** on rail and urban public transport matters including appropriate Pricing policy, (railway) restructuring, **urban public transport reform**, and involvement of the private sector through PPPs.

Aviation & SPACE

To improve their competitive position, many companies and organisations are entering into global alliances, which bring economies of scale and efficiency advantages. Ecorys takes an integrated approach which covers the full range of issues – from environmental aspects to planning, **demand** forecasting and market analysis to business plan development and financing. The air transport sector is facing sharp competition worldwide.

Freight

Even in times of recession demand for the transport of goods has continued to increase. The various modes of transport (road, rail, waterways, sea and air) have responded to increasing demand in different ways.

Ecorys has extensive experience dealing with freight transport issues at regional, national and international levels. We provide insight into the **social and economic** effects of freight transport sector. We measure the impact of policy instruments on the sector itself.

PORTS & Maritime

Ports are important instruments for trade and transport. Competition between ports is increasing. Port infrastructure developments occur rapidly. Privatization, PPP's, port organization and security and hub-feeder networks are key in the maritime industry.

Ecorys works in ports and maritime transport including port strategy and master planning, **maritime policy**, port organisation and management, shipping markets and feet segments.

- Yemen: Developing a Model Economic Zones/Industrial Estates Development Programme
- Worldwide: Evaluation of Urban Transport Projects
- Russia: Togliatti Public Urban Transport Restructuring Project
- India: Preparing a market demand study for the Port of Sutrapada, Gujarat

Monitoring and Evaluation

Complexity of development processes and associated interventions is being recognised. As a consequence, the pressure is on for practitioners to **design** and **implement** robust and innovative Monitoring & Evaluation techniques.

Ecorys has extensive experience of conducting many types of M&E assignments in the development cooperation sphere. Our track record includes **evaluations** of country strategies, specific modality mixes, programme portfolios as well as emerging topics such as donor exit management. Over the past years, we have successfully conducted evaluations in the agriculture, education, governance, health, microfinance, public administration and public finance management sectors. A share of our earnings is reinvested each year to fund **independent M&E** and social science research relevant to our clients' future needs.

Our approach is based on a simple premise – linking cutting-edge evaluation techniques with relevant sectoral expertise and local knowledge. We have supported many clients in their quest to **strengthen accountability** and stimulate learning

Monitoring

Ecorys has a long track record of undertaking **independent** external monitoring of development assistance programmes for many donor organisations. Monitoring involves the systematic collection of data to provide stakeholders an indication of the extent of achievement of objectives and progress in the use of allocated funds. In the past fifteen years we have conducted monitoring assignments in all regions of the world and covering all major development sectors and aid modalities.

Our monitoring work covers all the major sectors and puts us at the heart of many key policy debates in **development co-operation** – institution-building, the role of civil society, country-ownership and the choice of aid modality.

Evaluation

Over the years we can proudly point to numerous examples of our work shaping policy debates. We have contributed to strategies for socio-economic transformation in transition economies, bringing fresh perspectives to **interventions** in social sectors.

Ecorys has extensive experience in conducting complex evaluations of **aid modalities**. This includes evaluation of country strategies, specific modality mixes and programme portfolios. We have successfully conducted evaluations in the agriculture, education, governance, health, microfinance, public administration and public finance management sectors. Ecorys also has growing expertise in the field of both **ex-ante** and **ex-post (impact) Evaluations**.

Selected PROJECTS

- India: Impact Assessment of Himachal Pradesh Watershed Development Project
- India: "Monitoring & Evaluation for TNRTP Project in Tamil Nadu"
- Asia: Result-Oriented Monitoring (ROM) of operations in various countries.
- Nigeria: Monitoring and Evaluation of DFID's State Level Programme.

- India: Framework agreement for supporting DFID India work on impact and other evaluations.
- Asia & Africa: Joint Evaluation of Exit Management Botswana, Eritrea, India, Kenya, Malawi, South Africa.
- Worldwide: Joint Evaluation of Dutch CFAs Contribution to the Micro finance Sector.

Training and Capacity Building

INSTITUTIONAL Strengthening

Sustainable policy implementation requires strategy development and elaboration supported by clear focus on **human resource development**. To successfully deploy policies and programmes, **capacity and institutional development** are key.

As components of **institution building**, Ecorys has developed and successfully executed programmes for many institutions, including: organisational design - coordination systems, functional characteristics, job descriptions and attestation; change management; training needs assessment; development and realisation of specialised trainings, including certification programmes.

Change & PROCESS Management

Change management is all about **communicating** to relevant stakeholders about necessary changes in organisation or policy. More often than not, change management coincides with process management.

Ecorys knows that the success of change management projects rests on a thorough analysis of the starting situation. Only from this can we begin to determine need for and capability to change. Working together with the relevant actors in the change process is vital, as is good understanding and working knowledge of people management, budgets and financial management, operational management communication.

FINANCIAL advice

Ecorys advises on **customised** financing packages and provides full financial risk assessment to corporates, real estate developers or infrastructure sponsors. We also assist investors and corporates in asset management.

Our financial advisory services for Institutional Development include:

- Supporting the foundation of PPP units for the public and private sectors.
- Providing training on all aspects involved in PPPs
- Offering effective tools and creating toolkits to help public sector enter into sustainable partnerships with the private sector.
- Review and advise on current legislation and existing institutional frameworks and PPP strategies

Decision making SUPPORT

Decision making is in its very core a cognitive process. For (government) institutions and companies, decision making takes on the extra dimension of **socio-economic scope and implications**.

With our experience in the fields of analysis, policy formulation, evaluation and advice, Ecorys helps with our client's decision making needs.

We have extensive experience with **interim management** and **organisational support** assignments.

Selected PROJECTS

- India: Empowerment and Social Inclusion of women in India (sponsored by Royal Embassy of Nederland)

- Infrastructure Fund to invest in municipal infrastructure PPP
- Turkey: Strengthening the legal, policy and institutional framework for PPPs

Programme Management and Delivery

Programme Management & Technical Assistance

Corporate and public agencies seeking to control risk and introduce 'leaner' product or project delivery look to third parties to provide management services. Ecorys has an outstanding reputation for the development and delivery of large programmes for clients at all levels. We can provide a tailored and comprehensive package of services or individual components to progress your programme strategy, maximise impact, ensure spend targets are met and minimise risk.

GRANT & Fund Management

Ecorys has over 20 years of experience in providing grant management services to national and EU level public sector clients. Ecorys understands the specific needs and requirements of programme management as result of its longstanding involvement in programme implementation for several clients. In addition to sound process management, knowledge of the specific policy area is always involved. This ensures credible activities and guarantees that implementation stays close to objectives of programmes and policies.

Framework CONTRACT Management & RESOURCE Mobilisation

Ecorys has been involved in managing several Framework Contracts (FWCs) for over a decade. Most of these FWCs are for the European Commission, but also for other clients like the Swedish International Development Cooperation Agency (SIDA) and the Department for International Development (DFID).

Selected PROJECTS

- India: Technical Assistance Provider to the Uttar Pradesh Health Systems Strengthening Project (UPHSSP)
